

New Therapeutic Uses Program

Repurposing Drugs: A Shorter Path to Treatment

Christine Colvis, Ph.D.

Director, Drug Development Partnership Programs

Office of the Director

The Issue – New Therapeutic Uses

- The Problem: Therapeutic development is costly, complex and time-consuming.
 - TIME: 14 years (average)
 - FAILURE RATE: Exceeds 95%
 - COST: \$1 Billion or more per successful drug developed
- How the New Therapeutic Uses Program is improving the process:
 - Crowdsourcing
 - Matchmaking
 - Efficient drug repurposing partnerships

How can you get involved?

- **The Challenge**

- Expand the number of assets that pharmaceutical companies make publicly available.
- Improve the efficiency of clinical studies through patient engagement.
- Incorporate outcomes that are meaningful to patient quality of life.

- **The Opportunity**

- Please visit our poster to discuss opportunities for patient engagement.
