

NCATS Advisory Council September 2015

Concept Clearance

TRANSLATIONAL RESEARCH INFORMATICS AND OPERATIONS SUPPORT (TRIOS)

MICHELLE CULP, BSN, MPH
DIRECTOR OF CLINICAL OPERATIONS, DCI

NCATS

Goal

Provide a coordinated and comprehensive scientific and technical support to NCATS' translational research operations and management in order to harmonize and centralize activities across NCATS.

Potential Impact

- Coordinated tracking and oversight of NCATS' clinical programs
- Facilitate more rapid reporting clinical activities
- Ensure quality management and safety oversight of clinical programs
- Provide clinical and administrative resources
- Success will be evaluated through milestones and deliverables

Description of Initiative

- Information management and reporting for NCATS' translational and clinical programs
- Safety monitoring, quality management and oversight of clinical studies
- Tools, templates and standard processes for clinical study implementation
- General logistical and administrative support
