¹ NCATS received CTSA Program-specific appropriations language beginning in FY2014. CTSA Program-specific appropriations language in FY2012 and FY2013 was directed to the NIH Office of the Director.

² A CTSA Hub is defined as a UL1 award with a linked KL2 award and an optional TL1 award. No Cost Extensions (NCE) to Hub awards do not receive funding from NCATS in a particular fiscal year. NCEs do not count as funded Hubs in that fiscal year and are therefore not reflected in the table.

³ In FY2014 NCATS did not issue a CTSA Program Hub funding announcement as the program was being re-structured in response to the 2013 IOM recommendations. Eight CTSA Program Hubs that were positioned to re-compete for hub awards in FY2014 were issued orderly close-out supplements to enable them to remain active until a FY2015 funding announcement was available and posted.

⁴ NCATS investment in Administrative Supplements for FY2014 was \$93,000 less than what is shown in NIH RePORTER. NCATS investment in Administrative Supplements for FY2016 was \$23,389 more than what is shown in NIH RePORTER. RePORTER provides the most up-to-date information possible on funded projects, so the data are not frozen and changes in the administrative details of prior awards can occur. Grand total amounts for the fiscal years are accurate.
